DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 and 5-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The Applicant's remarks, filed on 19 November 2007, have been reviewed and are considered persuasive.

The Examiner notes that the prior art of record fails to teach a silicon wafer having the combination of a resistivity of 100 Ω cm or more, oxygen and carbon concentrations in the claimed ranges, and oxygen precipitates. The closest art of record is U.S. Patent No. 6,544,656 to Abe et al, which teaches a wafer having similar resistivity, oxygen concentration, and oxygen precipitate qualities as the claimed invention, but teaches away from carbon inclusion into the substrate (see column 4, line 50- column 5, line 30). Although other prior art references, such as JP 10-150048 to Sueoka, are directed toward the same goal of a high resistivity wafer and teach carbon inclusion, they lack the same oxygen precipitate qualities and oxygen concentration appearing in the claimed invention.

The Examiner further notes that the combination of oxygen precipitate density and size, the oxygen concentration, and the carbon concentration appearing in the claims are critical for controlling the wafer resistivity, the mechanical deformation of the wafer, and the gettering qualities of the wafer. Since neither the combination of the claimed ranges nor reasonable suggestions of optimizing the claimed quantities to achieve the

Art Unit: 2813

properties listed *supra* appear in the prior art of record, it is the Examiner's opinion that the prior art cannot reasonably be combined to meet the claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer M. Dolan whose telephone number is (571)272-1690. The examiner can normally be reached on Monday - Friday, 8:30 a.m. - 5:00 p.m..
